

HD-XA2

1080p HD DVD PLAYER

The HD-XA2 is our flagship HD DVD player and incorporates our latest technologies. With a chassis reinforced by solid brushed aluminum panels, the HD-XA2 uses advanced digital and analog video processing technology and includes 1080p with Deep Color support specified in HDMI™ 1.3a.

ADVANTAGE TOSHIBA

High definition playback delivers 720p/1080i/1080p resolution, up to six times the resolution of DVD*. Using leading-edge efficient video compression standards makes it possible to experience the full potential of your HDTV.

Silicon Optix Reon HQV™ processing to deliver full HD resolution and detail, and includes user-adjustable picture controls for both high definition and standard definition material.

HDMI™ with Deep Color, which represents the latest version of the multi-industry supported, all digital connection, for improved contrast and detail, and smoother transitions.

297 Mhz/12 bit Video DAC with 4x Oversampling reproduces crystal clear, lifelike images when connecting to your HDTV via HD Component Output.

Advanced audio, including Dolby® TrueHD, Dolby® Digital Plus and DTS® HD (core only), along with legacy formats including Dolby® Digital and DTS® bring an increased sonic realism to movie soundtracks.

Backwards compatibility means you can enjoy your existing library of DVDs and CDs, and through the process of upconversion and output through HDMI, your movies are scaled to match the resolution of your HD display.

Product & Packaging

Dimensions (WHD)	17.2" x 2.91" x 13.54"
UPC	0022265000168

IMPORTANT NOTES

HD DVD with high-definition content required for HD output. Viewing high-definition content and up-converting DVD content may require an HDCP capable DVI or HDMI input on your display device. Firmware update may be required for some interactive features depending on content, which may also require an always-on broadband internet connection. Some features may require additional bandwidth. Some recordable media may not be supported. Dolby Digital Plus, Dolby TrueHD and DTS support for up to 5.1 channels (DTS HD support for DTS core only). MP3/WMA audio files not supported. Some current DVDs and CDs may not be compatible. HDMI audio support for PCM only. Because HD DVD is a new format that makes use of new technologies, certain disc, digital connection and other compatibility and/or performance issues are possible. This may, in rare cases, include disc freezing while accessing certain disc features or functions, or certain parts of the disc not playing back or operating as fully intended. If you experience such issues, please refer to the FAQ sections of www.toshibahddvd.com or www.tacp.toshiba.com for information on possible work-around solutions or the availability of firmware updates that may resolve your problem, or contact Toshiba Customer Solutions. Some features subject to delayed availability. 1080p capable display required for 1080p output resolution. Deep Color feature as specified in HDMI 1.3a requires compatible Deep Color capable HD display and/or device. Some devices may not be compatible. *Resolution comparison based on 480i vs. 1080i pixel counts
